SUMMARY

Results-driven Information Technology learner with hands-on experience in developing inventory management, ordering, and administrative systems using Laravel, PHP, Java, JavaFX, MySQL, and MongoDB. Knowledgeable in database design, API integration, user authentication, and responsive UI development. Strong problem-solving skills, experience in team-based projects, and a commitment to building reliable software while continuously expanding technical expertise.

RELEVANT PROJECTS

Clinic Inventory Management System (JavaFX, MongoDB | 2025)

- Developed a desktop-based inventory management system for tracking medicines, supplies, and equipment.
- Implemented role-based access control for Directors, Admins, Doctors, and Nurses.
- Designed and managed MongoDB collections for inventory and transaction records.
- Built every modules and features that is implemented within the system.

Scholaria Mobile & Web Application (Laravel, PHP, MySQL, Expo React Native | 2026)

- Lead and collaborated in developing a learning management system with web and mobile platforms.
- Integrated REST APIs between Laravel backend and mobile application.
- Constructed and assisted in database design, authentication, and user management features.
- Managed and involved in testing and debugging application functionality.

Food Ordering Kiosk System (PHP, MySQL, HTML, CSS, JavaScript | 2025)

- Developed a kiosk-based ordering system with separate customer and staff interfaces.
- Implemented dynamic menu management using database integration.
- Created order processing and staff management functionalities.
- Designed responsive user interfaces to improve user experience.

EDUCATION

Bachelor of Science in Information Technology (2024 - 2026)

Ramon Magsaysay Memorial Colleges - General Santos City

- Consistent Dean's Lister

Bachelor of Science in Information Technology (2023 - 2024)

Cavite State University - Trece Martires City Campus

- Consistent Dean's Lister

SKILLS

Languages: Python, Java, PHP, JavaScript, SQL, HTML5, CSS3

Tools/Frameworks: Laravel, JavaFX, Java Swing, Expo, REST APIs

Databases: MySQL, MongoDB, Firebase

Tools: Git, GitHub, XAMPP, MySQL Workbench, MongoDB Compass, Postman, VS Code, Android Studio

Other Skills: User Research, Data Analysis, Prototyping
